Bring your project forward – Be part of AI Village

AI-MAS Winter Olympics (AIWO) is an international event dedicated to AI enthusiasts, which takes place on **February 23, 2013, in Bucharest**. AIWO represents a great opportunity for exchanging knowledge and sharing experience with the AI community through 3 sections: AI Olympics, AI Talks and AI Village.

AI Village is an interactive exhibition area to showcase the most interesting AI solutions, such as autonomous robots, gadgets and demos of innovative technologies, brought forward by research projects both from the academia and the industry. The exhibition will be open all day for visitors.

Areas of interest contain (but are not limited to) the following domains:

- Affective Computing
- AI for games
- Computer Vision
- Information Retrieval
- Machine Learning and Data Mining
- Multi-agent Systems

- Natural Language Processing
- Neural Networks
- Robotics
- Swarm Intelligence
- Virtual Reality

If you have a project you consider suitable for AI Village, submit it on our website before **February 1**.

Anyone can submit their project and apply for a spot in the Village. The projects will go through a selection process, due to exhibit space constraints.

Why send your project?

- show your work to the world
- get feedback and ideas for improving your application
- exchange viewpoints and extend your professional network
- interact with other AI enthusiasts
- get noticed by potential collaborators
- get in touch and share experience with universities and companies

The exhibitors can be provided with:

- accommodation in Bucharest during the event
- access to AI Talks
- lunch on February 23
- free access to all the social events during AIWO 2013
- a booth for presenting the project
- wifi and electricity for the booth
- other materials, on request
