

Ford Romania Intern Program Internship Workplan

Function Name:	IT Manager	Supervisor Name:	Costi Circiumaru
Department Name:	IT	Supervisor CDSID:	Ccircium
Assignment Location:	Craiova	Supervisor Position#:	

Project Description

Name: Stock management in warehouses

Build an HTML/ASP/SQL Web Application for stock management in warehouses (inputs, outputs, reports);
 The application will be hosted on a virtual IIS server in Ford;
 The application should manage inputs and outputs in a web interface;
 Administrators/Users Management;
 Authenticated users will have access to a web page where they can make predefined queries regarding the stock;
 Administration page (define parts, define stock alerts, etc.)

Measurable Objectives

- Real-time stock queries
- Stock history
- Stock alert

Expected Major Contributions

- Offers a stock snapshot in each managed warehouse
- Avoid stock 0 for managed stock elements

Expected Benefits to Intern

- The application can be globalized, it can be exported in other Ford Factories
- The application can be used not only for warehouses but also in departments for small specific stock management

Intern Qualifications (schooling, work experience, major)

- HTML/ASP programming skills
- Ability to work in Team environment
