Ford Romania Intern Program
Internship Workplan

Function Name:	IT Manager	Supervisor Name:	Costi Circiumaru
Department Name:	IT	Supervisor CDSID:	Ccircium
Assignment Location:	Craiova	Supervisor Position#:	

Project Description
Name: Develop

Build an application for monitoring server services status;
The application will be coded in VB.Net + SQL;
The application will allow the administrator to define the targeted servers and the monitored services;
The application will show to the authenticated users (predefined) the status of monitored services in a http interface

Measurable Objectives
- Keep all services status changes in a database
- Alert sensitive services status changes by email

Expected Major Contributions
- Reduction of production loss due to servers outage
- Centralized monitoring of critical services

Expected Benefits to Intern
- The application can be globalized, it can be exported in other Ford Factories
- Quick feedback via email from servers

Intern Qualifications (schooling, work experience, major)
- VB.Net/SQL programming skills
- Windows Server 2kX OS knowledge
- Ability to work in Team environment
