

## “Seeds for the Future” Program

Romania, 2015

### PROGRAM DETAILS - GLOBAL OVERVIEW

"Seeds for the Future" is Huawei's flagship CSR program designed to develop local ICT talent and enhance the transfer of knowledge. Currently, the expenditure on this initiative is the highest across the company, and the investments will continue over the long term. The program has been implemented in over 30 countries around the world, more than 10,000 students taking part in it.

### PROGRAM DETAILS – LOCAL OVERVIEW

Huawei has become a supporter of the Romanian senior education by customizing the educational program to inspire the new generation of ICT talents. By launching Seeds for the Future program, Huawei wishes to offer students both a unique intercultural experience, but also access to the Huawei world.

**PROGRAM OBJECTIVES:** Improve ICT education, helping bridge the gap between what is learned in IT education and what is necessary in the industry, and develop a pool of local ICT talents:

- The opportunity to work and learn in a world leading ICT company
- Gain knowledge about the latest innovative technologies & industry trends
- Explore several big cities in China, gain cross cultural and international experience

### INTERNSHIP PROGRAM IN 2015

- 10 internships during July – September
- The most proactive and dedicated 8 interns will attend a 2 weeks training session in China, as part of our international internship program
- Apply by sending your CV at [cobzaru.mihaela.anca@huawei.com](mailto:cobzaru.mihaela.anca@huawei.com) until 10<sup>th</sup> of May

# BUILDING A BETTER CONNECTED WORLD

## THE PROGRAM'S FIRST STEPS IN 2014

In 2014, “Developing talents of tomorrow” was the first step of the “Seeds for the Future” plan, in which a group of Romanian Students enjoyed the beauty of China, as well as the brilliant world of ITC, last Autumn.

**The program in 2014: 2 weeks in China, 8 students from 6 universities throughout the country.**

The program has had the support of both Ministry of Education and The Ministry of Communication and Information Technology, both agreeing to be the official sponsors for this project.
