Software engineer React Native

The E-TWOW – Electric Two Wheels brand is part of a large international concept, with headquarters both in China and Europe, focused on offering a new era in urban mobility, through our ingenious electric vehicles. E-Twow is a technology company that is changing how people get from point A to B via our electric scooters and bikes. We're empowering our communities with new mobility options that are clean, affordable, and a ton of fun!

As a React Native engineer at E-Twow, you will architect internal facing mobile applications that will enable us to bring the ultimate transportation solution to every corner of the world. We're launching our service quickly across the world, so you'll have your hands full building mobile features and making key design decisions for our suite of web apps. You'll be working alongside a group of engineers, designers, and PMs from top schools with experience building systems and apps at companies like Facebook, Twitter, and Square.

Responsibilities

* Use React Native to build slick and robust native apps that serve both our riders and internal users

* Work with a multi-functional team and ship the features timely with an acceptable quality

* Work closely with backend engineers to understand, design, and contribute to our APIs

* Build efficient and reusable front-end systems and abstractions

* Understand and excel at front-end standard methodologies

Requirements

* Degree in Computer Science from a top engineering school, or equivalent technical background

* Experience working with modern Javascript and Javascript libraries, well understanding the concepts of ES6/ES7, promises, and reactive programming

* Experience of mobile development is a plus but not required

* Fluency in React/Redux is a plus but not required

* Fluency in React Native is a plus but not required

What We Offer

* Opportunity to revolutionize transportation in your hometown with the leader in urban mobility solutions

* A position that offers a variety of career and resume building experiences with the fastest growing startup of 2019

* Scale with a rapidly growing organization, with tons of opportunity for growth

* Play a role in the transformation of urban mobility and sustainability

* Collaborate with a team of fun and motivated people

* Competitive salary and benefits

Here at E-Twow, we strive to build a workforce comprised of individuals with diverse backgrounds, abilities, minds, and identities that will help us to grow, not only as a company, but also as individuals. E-Twow is an Equal Opportunity Employer.
