Investing in motivation

Our Dutch and Romanian Management creates exceptional work place, assuring good pay, as well as the prospect of working in a company that systematically invests in **personal development**, provides challenging **projects** and experiences **sustained growth**.

If you are:

- An experienced senior developer or a fresh graduate with a university degree in Computer Science with at least one year of experience with Microsoft .NET technologies;
- Ambitious and self driven;
- Pro-active and detail - oriented;
- Passionate about new technologies and web development;
- Team spirit;
- Fluent in English;

If you can master:

- C#.NET and VB.NET, ASP.NET and ASP MVC, WPF and Silverlight;
- TSQL and experience with Microsoft SQL Server;
- PHP and ActionScript;
- J2EE/EJB/jQuery/GWT-Ext;

If you have good knowledge of:

- Data structures, algorithms and design patterns;
- Agile and Scrum development methodologies;
- Web Client Side technologies like Java Script/AJAX, HTML and CSS;
- Debugging techniques;
- Experience in architecting, designing, developing, deploying and maintaining large, high availability and rich content web applications and web services;
- Very good abilities to analyze, profile and optimize code for performance and memory usage.

Then your responsibilities would be:

- Define project architecture and planning together with your Team;
- Design & implement project tasks according to specifications and planning;
- Collaborate with quality engineers to ensure project deliverables meet the required internal quality standards;
- Perform research on various technologies useful for the project;
- Provide status and feedback to management.

Join NetRom as .NET or Java(J2EE) or PHP developer and you'll have guaranteed diversification and continuing projects, also a lot of activities that emphasize the notion of team building (hot meal at lunch, evening sports, knowledge sharing actions, interactive personal and professional development courses, teambuilding events, etc.).

About Us
